

How to export the notebook by using **nbconvert**

In this course, we prefer using the **nbconvert** command-line tool to export notebook files to PDF format. The command-line approach is better and safer than using Jupyter Notebook's 'File > Save and Export Notebook As > PDF' option. In previous courses, there were many cases where exported PDF files had issues displaying images and markdown cells, causing students to lose points due to hidden content.

To use nbconvert command-line to export the completed assignment notebook, in Anaconda Navigator, please select:

Please use `cd` command to go inside the folder containing the Assignment notebook. For example:

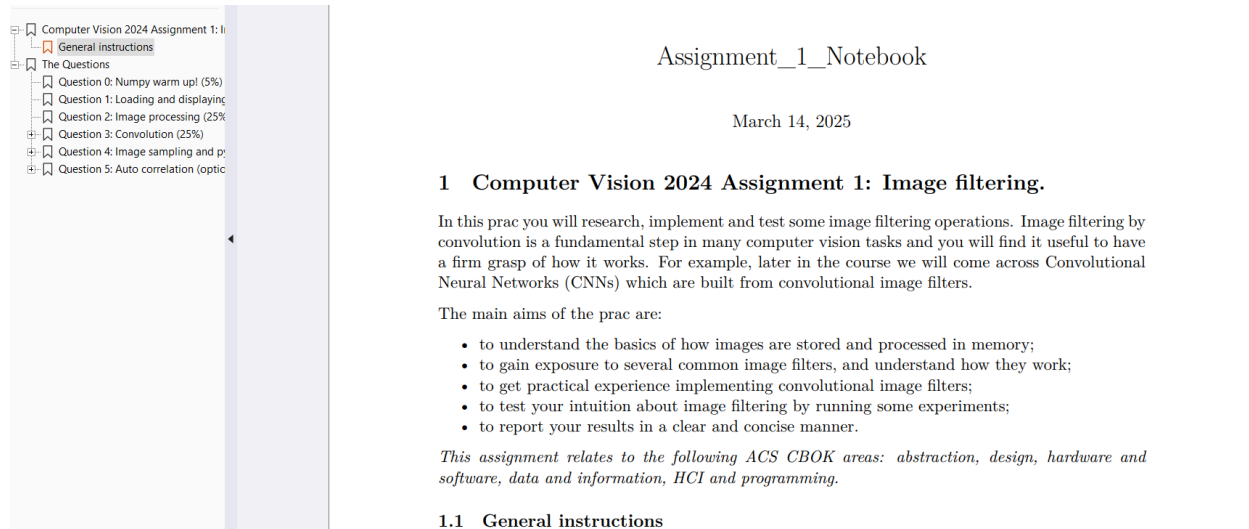

```
(base) D:\>cd D:\assignment1
```

Then, please use the command below to export the notebook into pdf format.

```
jupyter nbconvert Assignment_1_Notebook.ipynb --to pdf
```

```
(base) D:\assignment1>jupyter nbconvert Assignment_1_Notebook.ipynb --to pdf
[NbConvertApp] Converting notebook Assignment_1_Notebook.ipynb to pdf
[NbConvertApp] Support files will be in Assignment_1_Notebook_files\
[NbConvertApp] Making directory .\Assignment_1_Notebook_files
[NbConvertApp] Writing 112613 bytes to notebook.tex
[NbConvertApp] Building PDF
[NbConvertApp] Running xelatex 3 times: ['xelatex', 'notebook.tex', '-quiet']
[NbConvertApp] Running bibtex 1 time: ['bibtex', 'notebook']
[NbConvertApp] WARNING | b had problems, most likely because there were no citations
[NbConvertApp] PDF successfully created
[NbConvertApp] Writing 8238458 bytes to Assignment_1_Notebook.pdf
```

The exported PDF file will look as shown below—neat and beautiful.

How to submit correctly on MyUni

The correct submission should have:

- A pdf file
- A zip file contains notebook, code files, images.

File upload
[Echo360 Homework Embed](#)
[Office 365](#)

Upload a file, or choose a file you've already uploaded.

Assignment_1_Notebook.... ✕ < PDF file

Assignment_1.zip ✕ < zip file

[+ Add another file](#)
