

COMPSCI 3315 : Computer Vision

Installing Anaconda and necessary packages (March 2025)

Step 1: <https://www.anaconda.com/download>

Please enter your email address, and then click “Submit” to download

The screenshot shows the Anaconda website's 'Distribution' page. At the top, there's a navigation bar with 'Products', 'Solutions', 'Resources', 'Partners', and 'Company'. The main heading is 'Distribution' with a sub-heading 'Free Download*'. Below this, a paragraph explains that users can register to get everything needed to get started on their workstation, including Cloud Notebooks, Navigator, AI Assistant, Learning, and more. A list of four bullet points with green checkmarks describes the benefits: easily searching and installing thousands of data science, machine learning, and AI packages; managing packages and environments from a desktop application or command line; deploying across hardware and software platforms; and distribution installation on Windows, MacOS, or Linux. A small footnote at the bottom left states that use of Anaconda's offerings at an organization of more than 200 employees requires a Business or Enterprise license. On the right side, there's a modal form titled 'Provide email to download Distribution'. It contains an 'Email Address:' input field, a checkbox for agreeing to receive communication from Anaconda, and a 'Submit' button. A link to 'Skip registration' is also present.

Distribution

Free Download*

Register to get everything you need to get started on your workstation including Cloud Notebooks, Navigator, AI Assistant, Learning and more.

- ✓ Easily search and install thousands of data science, machine learning, and AI packages
- ✓ Manage packages and environments from a desktop application or work from the command line
- ✓ Deploy across hardware and software platforms
- ✓ Distribution installation on Windows, MacOS, or Linux

*Use of Anaconda's Offerings at an organization of more than 200 employees requires a Business or Enterprise license. [See Pricing](#)

Provide email to download Distribution

Email Address:

☐ Agree to receive communication from Anaconda regarding relevant content, products, and services. I understand that I can revoke this consent [here](#) at any time.

By continuing, I agree to Anaconda's [Privacy Policy](#) and [Terms of Service](#).

Submit >

[Skip registration](#)

Step 2: Please check the email from Anaconda for the download link

Anaconda Distribution Download

Thank you for choosing Anaconda and Conda packages.

Continue with your download.

Please select the OS system that you are using, and then download it.

Thank you for downloading!

Didn't download? [Go here](#) to download your version. For installation assistance, refer to [Troubleshooting](#).

Step 3: Run the download Installer, accept the License term, then wait until the Installation finishes.

License Agreement

Please review the license terms before installing Anaconda3 2024.10-1 (64-bit).

Press Page Down to see the rest of the agreement.

ANACONDA TERMS OF SERVICE

Please read these Terms of Service carefully before purchasing, using, accessing, or downloading any Anaconda Offerings (the "Offerings"). These Anaconda Terms of Service ("TOS") are between Anaconda, Inc. ("Anaconda") and you ("You"), the individual or entity acquiring and/or providing access to the Offerings. These TOS govern Your access, download, installation, or use of the Anaconda Offerings, which are provided to You in combination with the terms set forth in the applicable Offering Description, and are hereby incorporated into these TOS. Except where indicated otherwise, references to "You" shall include Your Users. You hereby acknowledge that these TOS are binding, and You affirm and signify your consent to these TOS by registering to, using, installing, downloading, or accessing the Anaconda Offerings

If you accept the terms of the agreement, click I Agree to continue. You must accept the agreement to install Anaconda3 2024.10-1 (64-bit).

**Advanced Installation Options**

Customize how Anaconda3 integrates with Windows

- ☒ Create shortcuts (supported packages only).
- ☐ Add Anaconda3 to my PATH environment variable
NOT recommended. This can lead to conflicts with other applications. Instead, use the Command Prompt and Powershell menus added to the Windows Start Menu.
- ☒ Register Anaconda3 as my default Python 3.12
Recommended. Allows other programs, such as VSCode, PyCharm, etc. to automatically detect Anaconda3 as the primary Python 3.12 on the system.
- ☐ Clear the package cache upon completion
Recommended. Recovers some disk space without harming functionality.

Step 4: Open “Anaconda Navigator”

Step 5: To install packages, please click at “Environment”

OpenCV: Open Computer Vision Library

Please select “Not Installed”

Please search “opencv” using the search bar at the top right, then click at the box **py-opencv** as shown below.

Then select “Apply” to install at the right bottom. The Install Packages window will pop up, please select “Apply”, then wait for installing this package.

Install Packages

15 packages will be installed

	Name	Unlink	Link	Channel	Action
1	*pixmap	-	0.40.0	pkgs/main	Install
2	*opencv	-	4.10.0	pkgs/main	Install
3	*libvorbis	-	1.3.7	pkgs/main	Install
4	*libogg	-	1.3.5	pkgs/main	Install
5	*libglib	-	2.78.4	pkgs/main	Install

* indicates the package is a dependency of a selected package

Cancel

Apply

Nbconvert: Convert Ipynb into pdf, latex, ...

Search Environments

base (root)

Not installed

Channels

Update index...

nbconvert

Name	Description	Version
☒ nbconvert-all		7.16.6
☐ nbconvert-core		7.16.6
☐ nbconvert-pandoc		7.16.6
☐ n-nbconvert		1.3.2

If there is some pop ups like below, please uncheck “Always show this dialog” and then click “Install”.

PyTorch: Deep Learning package

We do the same procedure to install Pytorch.

The screenshot shows the Anaconda environment manager interface. At the top, there's a search bar with 'pytorch' entered. Below it, a table lists available packages. The 'pytorch' package is selected, showing its description: 'Pytorch is an optimized tensor library for deep learning using gpus and cpus.' and version '2.5.1'.

Name	Description	Version
☐ lightning-utilities	Pytorch lightning sample project.	0.11.9
☒ pytorch	Pytorch is an optimized tensor library for deep learning using gpus and cpus.	2.5.1
☐ pytorch-cpu	Pytorch is an optimized tensor library for deep learning using gpus and cpus.	2.5.1

Below the table, a green 'Install Packages' dialog box is open. It shows a summary: '1 package will be modified 10 packages will be installed'. A table lists the packages to be installed:

	Name	Unlink	Link	Channel	Action
1	*sleef	-	3.5.1	pkgs/main	Install
2	*opentelemetry-api	-	1.26.0	pkgs/main	Install
3	*mpfr	-	4.2.1	pkgs/main	Install
4	*mpc	-	1.3.1	pkgs/main	Install
5	*libuv	-	1.48.0	pkgs/main	Install

Below the table, a note states: '* indicates the package is a dependency of a selected package'. At the bottom of the dialog, there are 'Cancel' and 'Apply' buttons.

Step 6: To verify that the packages installed correctly, please open “Jupyter Notebook” and use the code lines below:

Please click "Select" to use the kernel **base** where we installed the 2 packages.

Select Kernel

Select kernel for: "Untitled.ipynb"

Python [conda env:base] *

☐

Always start the preferred kernel

No Kernel

Select

Please use the code below.

```
[1]: import cv2
```

```
[3]: print(cv2.__version__)
```

```
4.10.0
```

```
[5]: import torch
```

```
[7]: print(torch.__version__)
```

```
2.5.1
```

We can observe that both packages are installed correctly.
